# OVER-DETENTION: ASYLUM-SEEKERS, INTERNATIONAL LAW, AND PATH DEPENDENCY

## INTRODUCTION

We have seen this problem before.<sup>1</sup> We have examined the shocking case studies of asylum-seekers detained categorically and for prolonged periods of time before.<sup>2</sup> We have watched the United States shirk their international legal commitments to ensure the dignity and humanity of refugees before.<sup>3</sup> Yet despite the ongoing outcry of non-governmental organizations (“NGOs”)<sup>4</sup> and legal scholars,<sup>5</sup> and despite recent attempts by the United States government to improve the immigration system,<sup>6</sup> little has been done to adequately improve the plight of detained asylum-seekers desperate to avoid removal to a country in which they are likely to face persecution.<sup>7</sup>

---

1. See, e.g., President Barack Obama, Remarks by the President on Comprehensive Immigration Reform in El Paso, Texas (May 10, 2011) [hereinafter Remarks by the President] (transcript available at <http://www.whitehouse.gov/the-press-office/2011/05/10/remarks-president-comprehensive-immigration-reform-el-paso-texas>) (“[T]he truth is, we’ve often wrestled with the politics of who is and who isn’t allowed to come into this country. This debate is not new.”).

2. See, e.g., AM. BAR ASS’N, *Excessive Use of Detention, in AMERICAN JUSTICE THROUGH IMMIGRANTS’ EYES* 59, 59–72 (2004) [hereinafter A.B.A.].

3. See, e.g., Bridget Kessler, *In Jail, No Notice, No Hearing . . . No Problem? A Closer Look at Immigration Detention and the Due Process Standards of the International Convention on Civil and Political Rights*, 24 AM. U. INT’L L. REV. 571 (2009).

4. See, e.g., HUMAN RIGHTS FIRST, U.S. DETENTION OF ASYLUM SEEKERS: SEEKING PROTECTION, FINDING PRISON (2009) [hereinafter SEEKING PROTECTION], available at <http://www.humanrightsfirst.org/wp-content/uploads/pdf/090429-RP-hrf-asylum-detention-report.pdf>.

5. See, e.g., A.B.A., *supra* note 2.

6. See, e.g., Memorandum from John Morton, Dir., U.S. Immigration & Customs Enforcement, Exercising Prosecutorial Discretion Consistent with the Civil Immigration Enforcement Priorities of the Agency for the Apprehension, Detention, and Removal of Aliens (June 17, 2011) [hereinafter Exercising Prosecutorial Discretion], <http://www.ice.gov/doclib/secure-communities/pdf/prosecutorial-discretion-memo.pdf>.

7. Compare Exercising Prosecutorial Discretion, *supra* note 6 (establishing prosecutorial discretion policy), with Julia Preston, *Obama Policy on Deporting Used Unevenly*, N. Y. TIMES, Nov. 13, 2011, at A16 (alleging that despite the factors to be considered in light of the prosecutorial discretion policy some groups see less benefits than others).

Against a backdrop of domestic concern—exacerbated by the attacks of 9/11<sup>8</sup>—that immigration carries inherent risks, the United States has detained non-citizens of all types for a variety of reasons<sup>9</sup> and pursuant to broad legal mandates.<sup>10</sup> While there are admittedly some conditions under which detention can be a legitimate governmental function, many countries often subject entrants to detention that is “arbitrary” or “unnecessary” in violation of international human rights laws and norms.<sup>11</sup> In the United States, the decision to categorically detain asylum-seekers—despite the existence of potential solutions in the international community, including successful

---

8. Kevin Sullivan & Mary Jordan, *Foreword* to A.B.A., *supra* note 2, at v.

The horrific September 11, 2001 terror attacks on New York City and Washington, D.C. fundamentally changed the way our nation of immigrants views itself. Shameful episodes of anti-immigrant violence immediately after the attacks grabbed most of the headlines. But the more significant shift has played out more quietly in federal government offices where immigration policy is made. The United States government, acting on a new urgency to control immigration and American borders, has tightened an array of regulations that affect how people from other countries may enter or live in the United States.

*Id.* While the 9/11 terror attacks perhaps intensified this fear, the concern about the link between immigration and domestic terrorism may have begun much earlier. See, e.g., Robert D. McFadden, *Immigration Hurts City, New Yorkers Say in Poll*, N. Y. TIMES, Oct. 18, 1993, at B4.

9. U.S. DEPT OF HOMELAND SEC., OFF. OF IMMIGR. STAT. ANN. REP., IMMIGRATION ENFORCEMENT ACTIONS: 2010, at 1 (2011) [hereinafter IMMIGRATION ENFORCEMENT ACTIONS], available at <http://www.dhs.gov/xlibrary/assets/statistics/publications/enforcement-ar-2010.pdf> (“Foreign nationals may be removable . . . for violations including failure to abide by the terms and conditions of admission or engaging in crimes such as violent crimes, document and benefit fraud, terrorist activity, and drug smuggling.”). While this Note will hone in upon the detention of refugees and asylum-seekers, it is important to remember that these groups are just a portion of the non-citizen population detained each year. See *id.*

10. E.g., 8 U.S.C. § 1225(b)(1)(A)(ii) (2012) (expedited removal and, thus, mandatory detention, for all aliens arriving without having gone through the proper immigration channels).

11. U.N. High Comm'r for Refugees [UNHCR], *Alternatives to Detention of Asylum Seekers and Refugees*, ¶¶ 1–2, U.N. Doc. POLAS/2006/03 (Apr. 2006) (by Ophelia Field & Alice Edwards) [hereinafter *Alternatives to Detention*] (finding that many states presume detention for asylum-seekers despite contrary interpretations of international laws).

NGO pilot efforts which use individualized risk-analysis<sup>12</sup> and “Alternatives to Detention”<sup>13</sup> (“ATD”) programs—may amount to unnecessary or arbitrary detention that violates international human rights law.<sup>14</sup> The arbitrary and unnecessary nature of these detentions may have a particularly egregious impact on the class of asylum-seekers<sup>15</sup> affected, where the depr-

---

12. Risk analysis is used in this Note to mean an individualized determination of a detained asylum-seeker’s eligibility for parole or release to an Alternatives to Detention program, which includes an assessment of that individual determining identity, risk of flight, potential for posing danger to the community, or regarding any other justification for release. See SEEKING PROTECTION, *supra* note 4, at 72–73.

13. “Alternatives to detention” is a term of art meaning an “alternative means of increasing the appearance and compliance of individual asylum seekers with asylum procedures and of meeting other legitimate concerns which States have attempted to address . . . through recourse to detention.” *Alternatives to Detention*, *supra* note 11, at ¶ 4. They will be discussed in more depth throughout this Note.

14. See, e.g., UNHCR, *Back to Basics: The Right to Liberty and Security of Person and ‘Alternatives to Detention’ of Refugees, Asylum-Seekers, Stateless Persons and Other Migrants*, 51–87, U.N. Doc. PPLA/2011/01.Rev.1 (Apr. 2011) (by Alice Edwards) [hereinafter *Back to Basics*]; *Alternatives to Detention*, *supra* note 11, at ¶¶ 1–2 (presuming detention may violate international law).

15. A subtle distinction exists between a refugee and an asylum-seeker; the United States defines refugees as those seeking protection before they arrive in the country while asylum-seekers are seeking protection after arriving in the United States. DANIEL C. MARTIN, U.S. DEP’T OF HOMELAND SEC., OFFICE OF IMMIGR. STAT. ANN. FLOW REP., REFUGEES AND ASYLEES: 2010, at 1, 4 (2011). The Department of Homeland Security further separates affirmative asylum-seekers, who apply for asylum at a port of entry or within one year of arrival in the United States, from defensive asylum-seekers, who file for asylum in order to avoid removal or those who are subject to expedited removal. *Id.* at 4. In contrast, international discourse distinguishes asylum-seekers from refugees on the basis that asylum-seekers “are individuals who have sought international protection and whose claims for refugee status have not yet been determined,” that is, their cases are still pending. 2009 UNHCR Stat. Y.B. 13, <http://www.unhcr.org/4ce532ff9.html>. The distinction is irrelevant for the purposes of this Note because the language within U.S. statutes grants authorization to seek asylum to the same non-citizens as those protected in the international definitions of “refugee.” Compare 8 U.S.C. § 1158(b)(1)(A) (2012) and 8 U.S.C. § 1101(42) (2012) with Convention Relating to the Status of Refugees [Refugee Convention], art. 1, July 28, 1951, 189 U.N.T.S. 150 and Protocol to the 1951 Convention Relating to the Status of Refugees [Protocol to Refugee Convention], Jan. 31, 1967, 19 U.S.T. 6223, 606 U.N.T.S. 267. This Note will focus on defensive asylum-seekers who announce their intention to seek asylum at the port of entry to the Unit-

vation of liberty can exacerbate the traumas that led to their flight from their country of origin in the first place.<sup>16</sup>

The United States has recognized that the immigration system needs work.<sup>17</sup> In the detention context, the United States has identified the need to incorporate risk analysis tools<sup>18</sup> and ATDs in order to improve the process.<sup>19</sup> However, the steps the United States has taken to develop and implement these tools have significantly deviated from the recommendations of experts in the field<sup>20</sup> and have failed thus far to bring the country

---

ed States and are thus trying to escape expedited removal and mandatory detention. 8 U.S.C. § 1225(b)(1)(A)(ii) (2012).

16. VERA INSTITUTE OF JUSTICE, TESTING COMMUNITY SUPERVISION FOR THE INS: AN EVALUATION OF THE APPEARANCE ASSISTANCE PROGRAM 1 (2000) [hereinafter VERA], available at <http://www.vera.org/download?file=615/finalreport.pdf> (“[D]etaining every noncitizen is neither just nor humane. Many people in removal proceedings are fleeing persecution in their own countries . . . Detention is an ordeal they should be spared.”).

20. LUTHERAN IMMIGRATION AND REFUGEE SERVICE, UNLOCKING LIBERTY: A WAY FORWARD FOR U.S. IMMIGRATION DETENTION POLICY 21 (2011) [hereinafter UNLOCKING LIBERTY] available at <http://lirs.org/wp-content/uploads/2012/05/RPTUNLOCKINGLIBERTY.pdf>. Asylum experts relevant to this Note include international bodies, such as the United Nations High Commissioner for Refugees and the Executive Committee of the High Commissioner’s Programme, and NGOs like Amnesty International, Human Rights First, Vera Institute of Justice, Lutheran Immigration and Refugee Service, and International Detention Coalition. See UNHCR, *UNHCR’s Revised Guidelines on Applicable Criteria and Standards relating to the Detention of Asylum-Seekers*, (Feb. 26 1999), [hereinafter UNHCR Guidelines] available at <http://www.unhcr.org/refworld/docid/3c2b3f844.html>; Executive Committee of the High Commissioner’s Programme, *Detention of Asylum-Seekers and Refugees: The Framework, the Problem and Recommended Practice*, UNHCR, U.N. Doc. EC/49/SC/CRP.13 (Jun. 4 1999) [hereinafter Ex-Com on Detention]; Amnesty Int’l, *Irregular Migrants and Asylum-Seekers: Alternatives to Immigration Detention*, AI Index POL 33/001/2009 (April 1,

into compliance with international law.<sup>21</sup> This Note argues that unless the United States incorporates the recommendations of asylum experts to use thorough risk-analysis in creating an individualized ATD program, it will be unlikely to reduce the unnecessary or arbitrary detention of many asylum-seekers and will therefore be unable to meet the minimum human rights standards required under international law.<sup>22</sup>

Part I of this Note looks at the current U.S. immigration detention system and some of the now well-established failures of the asylum detention process preventing the country from conforming to international human rights laws and norms. Part II explores the rationales behind detention of asylum-seekers with an eye toward how risk-analysis and ATDs can improve the system. Part III analyzes the current momentum for reform of the system in the context of *path dependency*, the notion that the future of the system will be dependent upon—and constrained by—decisions made now,<sup>23</sup> and addresses why it is essential to implement the recommendations of asylum experts now. Part IV discusses how the United States, by ignoring the recommendations of asylum experts regarding risk-analysis and alternatives to detention, has continuously violated international law. Part V lists the additional policy benefits to the United States should it adopt the proposed changes of asylum experts.

## I. BACKGROUND

### A. Current Status of the Detention System

Since its transition from the former Immigration and Naturalization Service (“INS”) to its current home as a subset of the Department of Homeland Security (“DHS”), the Immigration

SAMPSON ET AL., THE INTERNATIONAL DETENTION COALITION, THERE ARE ALTERNATIVES: A HANDBOOK FOR PREVENTING UNNECESSARY IMMIGRATION DETENTION (2011) available at <http://idcoalition.org/cap/handbook/>.

21. Compare Exercising Prosecutorial Discretion, *supra* note 6, with Preston, *supra* note 7.

22. E.g., *ExCom on Detention*, *supra* note 20; *Alternatives to Detention*, *supra* note 11.

23. Paul A. David, *Clio and the Economics of QWERTY*, 75 AM. ECON. REV. 332, 332 (1985).

and Customs Enforcement (“ICE”) division has rapidly expanded the scope of its detention power and the numerical capacity of individuals in detention.<sup>24</sup> The United Nations has defined detention as “the deprivation of liberty in a confined place, such as a prison or purpose-built reception or holding centre. It is at the extreme end of the spectrum of deprivations of liberty . . .”<sup>25</sup> In the U.S. immigration context, the purview of detention includes “the authority . . . to detain aliens who may be subject to removal for violations of administrative immigration law.”<sup>26</sup>

Throughout fiscal year 2010, ICE detained 363,064 non-citizens.<sup>27</sup> ICE now has bed-space to house 33,400 detainees daily and averages 33,330 detainees per day—a notable increase from the daily average of 27,990 in 2007.<sup>28</sup> As of 2009, asylum-seekers constituted about 1400 of these daily detainee totals.<sup>29</sup> In addition to a budget of over \$2 billion for its Immigration Detention and Removal Office (“DRO”), Congress gave DHS unsolicited additional funding to increase the total number of beds by 600, to 34,000 total, in fiscal year 2012.<sup>30</sup> The

26. SCHIRO, *supra* note 18, at 4.

27. IMMIGRATION ENFORCEMENT ACTIONS, *supra* note 9, at 4. This statistic includes all categories of non-citizens, not just asylum-seekers. *Id.*

28. *Fact Sheet: Detention Management*, U.S. IMMIGRATION AND CUSTOMS ENFORCEMENT [ICE], <http://www.ice.gov/news/library/factsheets/detention-mgmt.htm> (last accessed June 22, 2012). ICE notes that these numbers do not include counts for non-citizens detained with the Mexican Interior Repatriation Program or the Office of Refugee Resettlement. *Id.*

29. SCHIRO, *supra* note 18, at 11. 11,244 people were granted affirmative asylum in fiscal year 2010, with the highest percentage of those coming from China. MARTIN, *supra* note 15, at 5. This follows a general decreasing trend in grants of asylum over the past several years. *Id.*

30. H.R. REP. NO. 112-91, at 52 (2011); NATIONAL IMMIGRATION FORUM, THE MATH OF IMMIGRATION DETENTION: RUNAWAY COSTS FOR IMMIGRATION

amount of available bed space may affect the amount of time an individual is detained.<sup>31</sup> The average time of detention for asylum-seekers is controversial; some experts say it ranges from 47 to 109 days, while others indicate that it might be much longer.<sup>32</sup>

Within the U.S. system, detention often consists of placement in county jails or commercialized detention centers.<sup>33</sup> While this Note does not explore human rights violations or improvements extant within the detention system beyond its arbitrary or unnecessary overuse, it is worthy of mention that extensive scholarship explores issues involving the general criminalization of the civil immigration system;<sup>34</sup> the effects of

32. *Renewing America's Commitment to the Refugee Convention: The Refugee Protection Act of 2010: Before the S. Comm. on the Judiciary*, 111th Cong. (2010) (statement for the record from Physicians for Human Rights), available at <http://rcusa.org/uploads/pdfs/PHR%20Testimony,%205-19-10.pdf>; UNLOCKING LIBERTY, *supra* note 20, at 12. The U.S. Supreme Court case *Zadvydas v. Davis*, which declared detentions of more than six months to be unreasonable and at odds with the U.S. Constitution, does not protect asylum-seekers because it only addressed the detention of those who were detained while awaiting deportation, as opposed to awaiting asylum proceedings. 533 U.S. 678 (2001).

33. Inter-American Commission on Human Rights, Organization of American States, Report on Immigration in the United States: Detention and Due Process, OEA/Ser.L/V/II, doc.78/10, 85–87 (2010) [hereinafter IACHR]. As of 2009, approximately 50% of all detainees were held in county jails that also contained prisoners. SCHRIRO, *supra* note 18, at 10.

With only a few exceptions, the facilities that ICE uses to detain aliens were built, and operate, as jails and prisons to confine pre-trial and sentenced felons. ICE relies primarily on correctional incarceration standards designed for pre-trial felons and on correctional principles of care, custody, and control. These standards impose more restrictions and carry more costs than are necessary to effectively manage the majority of the detained population.

*Id.* at 2–3.

34. See generally Anil Kalhan, *Rethinking Immigration Detention*, 110 COLUM. L. REV. Sidebar 42 (2010). Criminal and immigrant populations in detention are treated essentially the same. SCHRIRO, *supra* note 18, at 4.

family and child detention;<sup>35</sup> and the lack of adequate medical care,<sup>36</sup> access to legal representation,<sup>37</sup> and workable civil standards for detention.<sup>38</sup>

### *B. The Process for Detaining Asylum-Seekers in the United States*

Currently, non-citizens entering the United States without legally having gone through the proper immigration process in advance are automatically placed in expedited removal proceedings unless they express their desire to apply for asylum to an immigration officer.<sup>39</sup> Once they do so, an immigration officer will detain the asylum-seeker pending the filing of their asylum application and an interview with an asylum officer.<sup>40</sup> From this point forward, the asylum-seeker is subject to mandatory detention, unless and until they can establish a basis for discretionary parole or they are deported.<sup>41</sup>

After filing for asylum, the detainee proceeds to what is referred to as a “credible fear hearing” or “credible fear inter-

36. See generally Riddhi Mukhopadhyay, *Death in Detention: Medical and Mental Health Consequences of Indefinite Detention of Immigrants in the United States*, 7 SEATTLE J. FOR SOC. JUST. 693 (2009).

37. HUMAN RIGHTS FIRST, JAILS AND JUMPSUITS: TRANSFORMING THE U.S. IMMIGRATION DETENTION SYSTEM—A TWO-YEAR REVIEW, 30 (2011) [hereinafter JAILS AND JUMPSUITS], available at <http://www.humanrightsfirst.org/wp-content/uploads/pdf/HRF-Jails-and-Jumpsuits-report.pdf>.

38. SCHRIRO, *supra* note 18, at 4 (“ICE adopted standards that are based upon corrections law and promulgated by correctional organizations to guide the operation of jails and prisons.”).

39. 8 U.S.C. § 1225(b)(1)(A)(ii)(2012). Some exceptions do exist to bar an arriving alien from applying for asylum in the United States. Notably, he or she cannot have come from a safe third country where he or she could have sought asylum; additionally, subject to extenuating circumstances, he or she cannot have waited more than a year to apply for asylum after arriving in the United States or have had a previous unsuccessful asylum application. 8 U.S.C. § 1158(a)(2)(A).

40. 8 U.S.C. § 1225(b)(1)(A)(ii). While both are members of ICE, asylum officers are distinct from immigration officers in that they have “professional training in country conditions, asylum law, and interview techniques comparable to that provided to full-time adjudicators of [asylum] applications” and that more experienced asylum officers supervise them. 8 U.S.C. § 1225(b)(1)(E).

41. 8 U.S.C. § 1225(b)(1)(B)(ii); IMMIGRATION ENFORCEMENT ACTIONS, *supra* note 9, at 2. Parole will be discussed in more depth below.

view,”<sup>42</sup> which may take place up to forty-five days after the filing of an application for asylum.<sup>43</sup> At the hearing, one seeking asylum must establish to the satisfaction of an asylum officer that he or she has a “credible fear of persecution” in his or her home country.<sup>44</sup> This fear is defined as “a significant possibility, taking into account the credibility of the statements made by the alien in support of the alien’s claim and other such facts as are known to the officer, that the alien could establish eligibility for asylum” under existing U.S. law.<sup>45</sup> At a credible fear hearing, an ICE officer has the sole ability to determine if the asylum-seeker has a credible fear that will likely support a future favorable asylum ruling by an immigration judge.<sup>46</sup> This is the first, but not only, opportunity for individual discretion or arbitrariness to seep into the asylum process.<sup>47</sup> If the determination of the asylum officer is unfavorable, the asylum-seeker will be slated for expedited removal “without further hearing or review.”<sup>48</sup> If favorable, the asylum officer will refer the asylum-seeker for asylum adjudication in front of an immigration judge.<sup>49</sup> By statute, the entire proceeding, excluding appeal, should be concluded within 180 days, although the

---

42. E.g., Brané & Lunholm, *supra* note 31, at 150.

43. 8 U.S.C. § 1158(d)(5)(A)(ii)(2012).

44. 8 U.S.C. § 1225(b)(1)(A)(ii).

45. 8 U.S.C. § 1225(b)(1)(B)(v). Authority for asylum itself is based on 8 U.S.C. § 1158. The United States limits the available categories of persecution for which one can claim asylum to “race, religion, nationality, membership in a particular social group, or political opinion.” 8 U.S.C. § 1101(a)(42) (2012).

46. Gwynne Skinner, *International Law Weekend 2009-I: Bringing International Law to Bear on the Detention of Refugees in the United States*, 16 WILLAMETTE J. INT’L L. & DISPUTE RES. 270, 275 n.18 (2008). Other than a lack of credible fear, factors that might lead to rejection of a claim at this point may include “committing certain crimes, posing a national security threat, engaging in the persecution of others, or firmly resettling in another country before coming to the United States.” MARTIN, *supra* note 15, at 4.

47. *ExCom on Detention*, *supra* note 20, at 3 (stating that discretion leads to arbitrariness). For a criticism of the United States’ ability to determine credibility as being arbitrary in relation to refugee determinations, see Andrew F. Moore, *Unsafe in America: A Review of the U.S.-Canada Safe Third Country Agreement*, 47 SANTA CLARA L. REV. 201, 237–238 (2007).

48. 8 U.S.C. § 1225(b)(1)(B)(iii)(I). If the asylum-seeker makes a “prompt” request, he or she may have the decision reviewed by an immigration judge, which by statute must happen no later than seven days after the negative credible fear determination. 8 U.S.C. § 1225(b)(1)(B)(iii)(III).

49. Skinner, *supra* note 46, at 275.

statute provides for the extension of this timeframe for “exceptional circumstances.”<sup>50</sup>

As noted, prior to being granted asylum by an immigration judge, arriving asylum-seekers are subject to mandatory detention unless they can establish their basis for discretionary parole.<sup>51</sup> This presumption in favor of detention is codified in 8 U.S.C. § 1182(d)(5)(A), which authorizes the Attorney General,

in his discretion[, to] parole into the United States temporarily under such conditions as he may prescribe only on a case-by-case basis for urgent humanitarian reasons or significant public benefit any alien applying for admission to the United States, but such parole of such alien shall not be regarded as an admission of the alien and when the purposes of such parole shall, in the opinion of the Attorney General, have been served the alien shall forthwith return or be returned to the custody from which he was paroled and thereafter his case shall continue to be dealt with in the same manner as that of any other applicant for admission to the United States.<sup>52</sup>

Thus, asylum-seekers will only be paroled if an individualized case analysis reveals there is an “urgent humanitarian reason” or “significant public benefit” for so doing.<sup>53</sup> This basis for parole has also been defined as applying to those classes of aliens “whose continued detention is not in the public interest as determined by [ICE officials].”<sup>54</sup> In a policy shift effective early 2010, ICE began to interpret parole in the “public interest” under this section to require “that the alien’s identity is sufficiently established, the alien poses neither a flight risk nor a danger

50. 8 U.S.C. § 1158(d)(5)(A)(iii).

51. 8 U.S.C. § 1225(b)(1)(B)(ii); 8 C.F.R. § 235.3(b)(2)(iii) (2012); Memorandum from John Morton, Assistant Secretary, U.S. Immigration and Customs Enforcement, to Immigration and Customs Enforcement, Parole of Arriving Aliens Found to Have a Credible Fear of Persecution or Torture, at 2 (Dec. 8, 2009) [hereinafter Credible Fear Parole], available at [http://www.ice.gov/doclib/dro/pdf/11002.1-hd-parole\\_of\\_arriving\\_aliens\\_found\\_credible\\_fear.pdf](http://www.ice.gov/doclib/dro/pdf/11002.1-hd-parole_of_arriving_aliens_found_credible_fear.pdf).

52. 8 U.S.C. § 1182(d)(5)(A)(2012).

53. 8 C.F.R. § 212.5(b)(5) (2012). Other classes enumerated under this section are more readily eligible for parole because they do not include a discretionary determination by an ICE official; these include individuals with serious medical conditions, pregnant women, juveniles, and those who are serving as witnesses in court proceedings. *Id.*

54. 8 U.S.C. § 1182(d)(5)(A). See also 8 C.F.R. § 212.5(b); Credible Fear Parole, *supra* note 51, at 2, 6–8.

to the community, and no additional factors weigh against the release of the alien.”<sup>55</sup>

While this development is a positive shift because it streamlined and increased the transparency of parole decisions, the proof requirements remain an especially weighty burden for asylum-seekers.<sup>56</sup> Despite apparent sympathy to the circumstances of asylum-seekers, the policy emphasizes the discretionary nature of parole and requires the asylum-seeker to bear the burden of demonstrating this information to the satisfaction of an ICE officer.<sup>57</sup> The policy standards themselves recognize the inherent difficulties for asylum-seekers to provide adequate documentation or produce credible witnesses to corroborate their claims on asylum matters.<sup>58</sup> These difficulties may include a lack of travel documents, often associated with an asylum-seeker’s unwillingness or inability to contact their for-

---

55. Credible Fear Parole, *supra* note 51, at 6. In 2011, Morton issued an additional directive, entitled *Exercising Prosecutorial Discretion Consistent with the Civil Immigration Enforcement Priorities of the Agency for the Apprehension, Detention, and Removal of Aliens* (“Exercising Prosecutorial Discretion”), which essentially incorporates the earlier memo and reiterates the discretion of ICE officers to grant parole to an asylum-seeker under specific circumstances. See *Exercising Prosecutorial Discretion*, *supra* note 6. ICE is quick to add that the established policy creates no private cause of action. Credible Fear Parole, *supra* note 51, at 10.

56. IACHR, *supra* note 33, at 45–47. The international community has reviewed and commented on the general shift in ICE detention policy under the Obama Administration. See, e.g., *id.* On the positive side, asylum-seekers no longer have to file for parole; a parole meeting is automatic within seven days of an asylum officer determining that the asylum-seeker has a credible fear of persecution. *Id.* There are provisions to improve the transparency of the process both through increased documentation and through informing asylum-seekers about the process and their rights within it. *Id.* However, there are criticisms in the international community that these changes do not adequately address the problems for detainees, as they still bear a potentially “insurmountable” burden of proof on the identity, flight risk, and security issues. *Id.* Furthermore, because of the discretionary nature of the process, there is great potential for arbitrary denials of parole, and thus arbitrary detention; this arbitrariness is especially obvious when considering regional disparities in parole denials. *Id.* Additionally, negative parole determinations remain reviewable only at the discretion of an ICE officer, which enforces the officer’s role as both “judge and jailer.” IACHR, *supra* note 33, at 45–47. See also Kalhan, *supra* note 34, at 51. For the policy itself, see *Exercising Prosecutorial Discretion*, *supra* note 6.

57. Credible Fear Parole, *supra* note 51, at 6–8.

58. *Id.*

mer government, or a lack of ties to any community within the United States as a result of their recent urgent arrival.<sup>59</sup> Asylum-seekers are additionally prejudiced because, by virtue of their situation, any attempt to meet this proof requirement to gain parole must be done while in detention.<sup>60</sup> Moreover, the same set of challenges, particularly the notion that “detention will often deprive the asylum-seeker of an opportunity to present his or her [case] or to have the assistance of counsel,”<sup>61</sup> limit the asylum-seeker’s ability to successfully obtain parole.<sup>62</sup> Furthermore, because the policy standards are non-binding, they can be changed at any time and thus do not provide any lasting guarantees even for the opportunity of parole.<sup>63</sup> As a result, the system remains weighted in favor of continued detention.<sup>64</sup>

### C. How the U.S. Detention System Violates International Human Rights Laws and Norms

Numerous legal scholars and advocacy groups have argued that the U.S. detention policy—featuring a presumption in fa-

vor of detention—violates international obligations.<sup>65</sup> Various treaties and conventions articulate an aversion to immigration detention in the vast majority of circumstances, finding it to be violative of human rights principles.<sup>66</sup> This includes the more specific rules regarding asylum-seekers who declare their desire to seek asylum once they are within the country to which they fled.<sup>67</sup> “In most cases, only if an individual’s claim to refugee status is examined *before* he or she is affected by an exercise of State jurisdiction . . . can the State be sure that its international obligations are met.”<sup>68</sup> This pre-approval, however, may prove challenging for asylum-seekers to attain given that the persecution many of them are fleeing might not provide the time or opportunity to plan ahead and apply for protection in another country before leaving their home country.<sup>69</sup>

The United States is not a party to all of such conventions or treaties,<sup>70</sup> although it is arguably bound under customary international laws<sup>71</sup> or norms to abide by them anyway.<sup>72</sup> Codifi-

69. *See, e.g.*, Credible Fear Parole, *supra* note 51, at 6 (recognizing that arriving aliens might not have travel documents because of flight).

70. For example, the United States “remains the only state, other than Somalia, which has not ratified the [Convention on the Rights of the Child],” a convention essential for guaranteeing rights of children and families in asylum and other contexts. Brané & Lundholm, *supra* note 31, at 153.

71. Customary international law is “international law that derives from the practice of states and is accepted by them as legally binding. This is one of the principal sources or building blocks of the international legal system.” BLACK’S LAW DICTIONARY 892 (9th ed. 2009).

72. Restatement (Third) of Foreign Relations Law § 111(1) (1987) (“International law and international agreements of the United States are law of the United States and supreme over the law of the several States.”). *See also*

cation of customary international law declares that a country “violates international law if, as a matter of state policy, it practices, encourages or condones . . . prolonged arbitrary detention.”<sup>73</sup> Admittedly, some international laws or norms have exigency exceptions that allow states to detain aliens in cases of “necessity.”<sup>74</sup> However, as most of those detained do not present any risks to the State from which they are seeking aid, these exigency exceptions do not justify the categorical detention of all asylum-seekers.<sup>75</sup>

There are multiple international treaties that protect the rights of people seeking asylum, and many have prohibitions against “arbitrary” detention, “unnecessary” detention, or both.<sup>76</sup> Beginning with the Universal Declaration of Human Rights (“UDHR”), the international community has recognized “the right to seek and to enjoy in other countries asylum from persecution.”<sup>77</sup> Furthermore, the UDHR established that “no one shall be subjected to *arbitrary* arrest, detention, or exile.”<sup>78</sup> While establishing these rights that would come to form the basis of international human rights law, the drafters of the UDHR did not define many of the terms they used, including “arbitrary.”<sup>79</sup>

The 1951 Convention Relating to the Status of Refugees (“1951 Convention”) expanded upon the UDHR by creating a multilateral treaty wherein “the contracting states shall not apply to the movements of such refugees restrictions other

75. See *Back to Basics*, *supra* note 14, at 2 (“[L]ess than ten percent of asylum applicants . . . disappear when they are released to proper supervision and facilities.”).

76. UDHR, *supra* note 66, art. 9 (against arbitrary detention); Refugee Convention, *supra* note 15; Protocol to Refugee Convention, *supra* note 15; ICCPR, *supra* note 66, at arts. 9, 12 (against arbitrary and unnecessary detention). The two terms are interrelated, as detaining unnecessarily can constitute arbitrariness. See, e.g. Brané & Lundholm, *supra* note 31, at 157.

77. UDHR, *supra* note 66, art. 14(1)(III).

78. *Id.* art. 9 (emphasis added).

79. See UDHR, *supra* note 66, art. 14(1)(III) (not defining terms used); *The Foundation of International Human Rights Law*, [http://www.un.org/en/documents/udhr/hr\\_law.shtml](http://www.un.org/en/documents/udhr/hr_law.shtml) (last accessed June 22, 2012) (UDHR as basis for field of international human rights law).

than those which are *necessary* and such restrictions shall only be applied until their status in the country is regularized or they obtain admission into another country.”<sup>80</sup> While detention for identity verification, public safety, and national security have been given as examples of detention that could *potentially* be considered “necessary,” and therefore permissible under the 1951 Convention, some scholars have interpreted detention subsequent to these conditions to be only for extraordinary circumstances.<sup>81</sup> While the United States did not sign the 1951 Convention, it did ratify the 1967 Protocol to the 1951 Convention that incorporated and modernized the Convention, thereby binding the United States to those international obligations.<sup>82</sup>

In addition to the 1951 Convention/1967 Protocol restrictions against unnecessary detention, the 1966 International Covenant on Civil and Political Rights (“ICCPR”) prohibits detention from being “arbitrary.”<sup>83</sup> Under Article 9 of the ICCPR, arbitrary detention, though not precisely defined, is expressly prohibited.<sup>84</sup> Article 9 further holds speedy access to a court proceeding to be essential for anyone “deprived of his liberty by . . . detention.”<sup>85</sup>

Because much of the language in these treaties is vague or undefined, the international community seeks guidance from both the United Nations High Commissioner for Refugees (“UNHCR”) and the Executive Committee of the UNHCR (“Ex-

81. Goodwin-Gill, *supra* note 60, at 232.

82. Refugee Convention, *supra* note 15; Protocol to Refugee Convention, *supra* note 15. The United States signed the 1967 Protocol without any reservations, understandings, or declarations (“RUDs”) relevant to this analysis. Protocol to Refugee Convention, *supra* note 15.

83. ICCPR, *supra* note 66, art. 9(1). The United States ratified the ICCPR in 1992, attaching RUDs that limit some provisions, but none specifically relevant to this analysis. *Id.* The United States declared the Convention to be non-self-executing, or incapable of taking effect without implementing legislation. *Id.*; Kessler, *supra* note 3, at 577; BLACK’S LAW DICTIONARY 1482 (9th ed. 2009) (defining self-executing).

84. ICCPR, *supra* note 66, art. 9(1); Kessler, *supra* note 3, at 580 (“In the context of Article 9(1), [arbitrary] encompasses not just unlawful detentions, but also all those that are unjust, unpredictable, unreasonable, capricious, and disproportional.”).

85. ICCPR, *supra* note 66, art. 9(4).

Com") in interpreting its obligations to refugees.<sup>86</sup> The ExCom has stated that

[W]ide discretionary powers [to detain] . . . are far too frequently applied in an arbitrary manner. For instance, a large number of asylum-seekers are detained on the formal basis that it is likely that they will abscond . . . international standards dictate that there must be some substantive basis for such a conclusion in the individual case.<sup>87</sup>

The specious justification of needing to prove an asylum-seeker's identity is yet another example of arbitrariness in the detention process.<sup>88</sup> Proving identity "should not routinely be judged necessary" in light of the circumstances which lead asylum-seekers to flee persecution in the first place.<sup>89</sup> The ExCom guidelines emphasize that implementing individualized, "prompt, mandatory and periodic review of all detention orders before an independent and impartial body" of the destination-state's need to detain is fundamental to avoiding arbitrary detention.<sup>90</sup> Furthermore, the UNHCR has continually advocated for a presumption *against* detention.<sup>91</sup>

Scholars have additionally argued that arbitrary detention exists where there is "inappropriateness, injustice, and lack of predictability" in the detention process.<sup>92</sup> "Arbitrary detention occurs when refugee applicants are detained on the basis of broad criteria that do not allow for individualized determina-

tions of the need for detention, when there is no administrative or judicial review, or when detention occurs for disproportionate or extended periods.”<sup>93</sup>

U.S. practices are arbitrary because detention is applied as a “blanket policy;” chances for parole—varying “anywhere from 0.5% to 98%”—are inconsistent;<sup>94</sup> judicial review, in practice, is either unavailable or limited by judges citing a lack of jurisdiction; and because compliance rates are quite high, further supporting “the argument that the detention of asylum seekers is arbitrary because it is unnecessary.”<sup>95</sup> Moreover, there is evidence to suggest arbitrariness in parole decisions, as some watchdog groups have found that the choice to parole an asylum-seeker can sometimes be made based on available bed space in detention centers rather than the merits of an individual’s claim for release.<sup>96</sup> As put forth in the Restatement Third, “[A] single, brief, arbitrary detention by an official of a state party to one of the principal international agreements might violate that agreement; arbitrary detention violates customary law if it is prolonged and practiced as state policy.”<sup>97</sup> This weighs against the United States’ categorical detention of all asylum-seekers because, without sufficient individualized assessment, there is no way to ensure detention is necessary.<sup>98</sup> Additionally, because the U.S. policy leaves determinations of credible fear and parole to the discretion of individual ICE officers, any localized breach or non-compliance can result in international law violations.<sup>99</sup>

The international community has noticed the United States’ violations of international law.<sup>100</sup> Following his May 2007 visit, the UN Special Rapporteur on Human Rights of Migrants expressed his “serious concern” with the status of the U.S. deten-

tion system.<sup>101</sup> The Special Rapporteur “[came] to the conclusion that the United States ha[d] failed to adhere to its international obligations to make the human rights of the 37.5 million migrants living in the country . . . a national priority, using a comprehensive and coordinated national policy based on clear international obligations.”<sup>102</sup> His report went on to discuss the various violations of international law within the United States<sup>103</sup> and made recommendations for improvement that included the complete elimination of mandatory detention.<sup>104</sup> Similarly, the Inter-American Commission on Human Rights produced in 2011 a comprehensive report on the U.S. immigration and detention system.<sup>105</sup> Along with urging the United States to “comply fully with the international human rights obligations under the American Declaration [of the Rights and Duties of Man],”<sup>106</sup> the Commission advocated for the country’s discontinuation of mandatory detention practices.<sup>107</sup>

## II. DISASSOCIATING FROM PRESUMPTIONS THAT FAVOR DETENTION

In order to become compliant with international law, the U.S. detention practices for refugees and asylum-seekers need to align more closely with the protection-based mandates of the aforementioned provisions that proscribe detention from being either arbitrary or unnecessary.<sup>108</sup> To do this, the United States needs to utilize risk-analysis and ATDs to release or parole detainees held without legitimate justification.<sup>109</sup> However, no alternative program can be successful until the U.S. immigration system shifts its application of immigration statutes from

105. IACHR, *supra* note 33.

106. *Id.* at 155. In its reply to the draft version of the report, the United States was quick to point out that the American Declaration is “a nonbinding instrument that does not itself create legal rights or impose legal obligations on signatory states.” *Id.* at 7. The IACHR countered that the Declaration does create obligations for member and non-member states alike under the charter of the Organization of American States, the American regional counterpart to the United Nations, of which the United States is a member. *Id.* at 10.

107. *Id.* at 147.

108. *See Part I.B., supra.*

109. *See, e.g., Amnesty Int'l, supra* note 20, at 16.

the categorical mandatory detention of asylum-seekers to a more flexible system where detention is used only as a last resort.<sup>110</sup> Many asylum experts have advocated for this and have created programs based on the “presumption against detention” model.<sup>111</sup> To understand how, by following suit, the United States could avoid arbitrary or unnecessary detention, it is first helpful to recognize the rationales it puts forth for using a mandatory detention policy in the first place.<sup>112</sup> Section A enunciates what risks the United States assumes when, rather than detain, it releases asylum-seekers into an ATD program and, by extension, the community. Sections B and C seek to understand the potential benefits of effectively implemented risk analysis and ATD programs as compared to those currently in operation within the U.S. system.

#### *A. Detention Rationales*

Countries often cite the inherent risks associated with admitting aliens as a rationale for detaining them.<sup>113</sup> As discussed in Part I.B, the current U.S. detention policy centers on these risks by presuming detention for aliens unless they are able to establish: 1) their identity, 2) that they are not a flight risk and, 3) that they are not a danger to society; or they must establish they have an additional extenuating circumstance that justifies their release.<sup>114</sup> By exploring the scope of these inherent risks, the United States can better address any actual risks and ultimately eliminate the use of detention that is excessive in matching the scope of that risk.<sup>115</sup>

The United States justifies detention—at least until there is satisfactory proof of the asylum-seeker’s identity—by citing the need to ensure that the alien will comply with specific proceedings, including meeting attendance, hearings, and, potentially,

113. See *id.*

114. Credible Fear Parole, *supra* note 51, at 2–3, 6–8. Extenuating circumstances include serious medical conditions, pregnancy, juvenile status, and aliens slated to serve as witnesses. 8 C.F.R § 212.5(b); Credible Fear Parole, *supra* note 51, at 2.

115. See Brané, *supra* note 31, at 149–52.

removal.<sup>116</sup> The United States has declared, “asylum-related fraud is of genuine concern”<sup>117</sup> and also wants to be certain before paroling an asylum-seeker that the person is not threatening to the community or the nation as a whole.<sup>118</sup> Further, the current policy indicates that detention will continue if there are “serious adverse foreign policy consequences that may result if the alien is released or [if there are] overriding law enforcement interests.”<sup>119</sup> Moreover, the U.S. immigration system is bogged down<sup>120</sup> and the caseload in immigration courts is high, increasing the time that asylum-seekers in detention must wait for their case to be heard.<sup>121</sup>

Yet if the U.S. method of detention is meant to serve as a deterrence to emigration, the strategy itself would violate international laws.<sup>122</sup> Regardless of a host country’s detention policies, asylum-seekers will always impose some level of risk to that country.<sup>123</sup> Thus, to argue that U.S. asylum detention is an

---

118. *Id.* at 8.

119. *Id.*

120. See, e.g., Michael Matza, *Immigration Cases Clogging Federal Courts*, PHILA. INQUIRER, July 18, 2011, at A2 (“Despite the nationwide hiring of more than 40 additional [immigration court] judges in the past year, the number of deportation cases, asylum claims, and green-card fraud prosecutions ... is at an all time high: 275,000 and climbing.”); Dan Moffett, *Conveyor Belt to Deportation: Asylum Cases don’t get Attention they Deserve*, PALM BEACH POST, Feb. 16, 2010, at A14 (“the system is choked by an exploding caseload and an exponential increase in outside pressures...the backlog has gotten progressively worse in the last decade.”) (internal quotation marks omitted).

121. See, e.g., Lenni B. Benson & Russell R. Walker, *Enhancing Quality and Timeliness in Immigration Removal Adjudication, Report for the Administrative Conference for the United States*, June 7, 2012, 40–42, available at <http://www.acus.gov/wp-content/uploads/downloads/2012/06/Enhancing-Quality-and-Timeliness-in-Immigration-Removal-Adjudication-Final-June-72012.pdf> (suggesting that defensive asylum cases should be heard by asylum officers like affirmative cases are, rather than immigration judges, in order to speed the process).

122. Refugee Convention, *supra* note 15, at art. 31(2); Protocol to Refugee Convention, *supra* note 15 (incorporating the articles of the Refugee Convention); See *Alternatives to Detention*, *supra* note 11, at 228 (noting the fear that deterrence is the true rationale behind U.S. detention and parole policies).

123. *Back to Basics*, *supra* note 14, at 1. “Any reduction in global asylum numbers have been associated with non-entrée policies, including contain-

effective deterrence factor is to ignore the reason that people are seeking asylum in the first place: they consider the situation they are fleeing to be worse.<sup>124</sup> Risk-analysis tools and ATDs can work together to ameliorate the concerns that justify detention, and reduce the burden on the U.S. immigration system, by allowing for the parole of more asylum-seekers.<sup>125</sup>

### *B. The Importance of Risk-Analysis*

To address these limited, but admittedly legitimate, fears and still comply with international obligations, the United States needs to assess the level of risk that asylum-seekers pose on an individual level, regarding both danger to society and risk of flight.<sup>126</sup> Risk-analysis tools fill the gap between categorical detention and ATDs by ensuring that any method used for a person is necessary and not arbitrary, thus complying with international treaties.<sup>127</sup> Detention can be legitimate under international law only when an *individualized* assessment establishes that there is no lesser method that the government can take to mitigate the dangers posed by that particular non-citizen.<sup>128</sup> This is because

international human rights law requires that detention decisions be made on a case-by-case basis after an individualized assessment of the functional and legitimate need of detaining a particular individual, the understanding that anyone deprived of liberty is entitled to judicial review of this decision,

---

ment in regions of origin and interception/interdiction measures, or can be attributed to large-scale repatriation programmes.” *Id.* at 1 n.4.

124. *Back to Basics*, *supra* note 14, at 2 (“[T]hreats to life or freedom in countries of origin are likely to be a greater push factor than any disincentive created by detention policies in countries of destination.”). “The principal aim of asylum seekers and refugees is to reach a place of safety . . . those who are aware of the prospect of detention before arrival believe it is an unavoidable part of the journey, that they will still be treated humanely despite being detained.” SAMPSON, *supra* note 20, at 11.

125. SAMPSON, *supra* note 20, at 22.

126. SCHIRO, *supra* note 18, at 17, 20. While this Note focuses on risk-analysis as the capacity to reduce threats posed to the community, the assessments can also include screening for special vulnerabilities present in the individual that require attention. SAMPSON, *supra* note 20, at 22.

127. UNLOCKING LIBERTY, *supra* note 20, at 15.

128. See, e.g., *ExCom on Detention*, *supra* note 20, at 3 (noting that arbitrariness results unless there is an individualized determination that a person is likely to abscond).

and that any restriction of liberty should be the least restrictive means necessary.<sup>129</sup>

An appropriate risk assessment tool would allow the United States to screen for the identified threats posed by non-citizens entering the country—lack of identity, risk of flight, and risk of danger—in order to make decisions about the level of supervision and support necessary to ensure compliance with the system.<sup>130</sup> Such a tool could allow the United States to increase legitimacy within the system through increased compliance while reducing detention costs in favor of less-costly ATDs.<sup>131</sup>

One criticism of the efficacy of any risk-assessment procedure is that there is a general absence of data at either the national or the international level regarding the success or failure of asylum-seekers to comply with proceedings or mandates.<sup>132</sup> “The scarcity of governmental statistics with regard to those who abscond [or fail to comply with a removal order] severely weakens the empirical evaluation of one form of conditional release in comparison to another.”<sup>133</sup> One way to ensure that asylum-seekers are paroled or, if detained, that detention is in the least restrictive manner, is to increase predictability of asylum-seekers absconding by improving data collection via risk assessments.<sup>134</sup>

An interesting parallel can be drawn to recent risk and data collection paradigms the U.S. Customs and Border Patrol (“CBP”) has utilized, in the context of national security, regarding the flow of people and goods through U.S. borders.<sup>135</sup> In response to increasing terror threats against the United States, CBP has utilized improved data analysis to distinguish be-

For example, the Northern Border Project has the goal of developing technology along the U.S./Canada border to better address the challenges of protecting that border. It includes testing an "Apex-Secure Transit Corridor" wherein members of the transit industry use government-approved technology when crossing the border to streamline the security screening process. U.S. DEPARTMENT OF HOMELAND SECURITY [DHS], CBP, NORTHERN BORDER DIVISION FACT SHEET, available at [http://www.cbp.gov/linkhandler/cgov/newsroom/fact\\_sheets/border/secure\\_border/northern\\_border\\_fs.ctt/northern\\_border\\_fs.pdf](http://www.cbp.gov/linkhandler/cgov/newsroom/fact_sheets/border/secure_border/northern_border_fs.ctt/northern_border_fs.pdf) (Last accessed Sept. 17, 2012).

140. Compare *id.* See also, *Holding Patterns*, *supra* note 25, at 28:30–30:18 (discussing frustration at how detention issues become localized despite the fact that many countries face them, but how governments are beginning to work together).

threats—while also avoiding unnecessary or arbitrary detention by releasing individuals who qualify into ATDs.<sup>141</sup> To ensure that the process does not become discriminatory or too bureaucratic, expert input, trained staff, specific guidelines, and formal review should be a part of any new data analysis process.<sup>142</sup>

While overriding long-standing aversions to sharing between countries could be a challenge at any level of cooperation, the benefits of increased data sharing and analysis in this digitized, information-driven society outweigh the drawbacks.<sup>143</sup> Data regarding compliance on a national or international level could influence detention planning on the whole and decisions made in individual cases in the same way data from pilot programs have already shaped decisions on a smaller scale.<sup>144</sup> Ultimately, by “designing effective alternatives to detention and knowing when they can and should be relied upon to work,” risk analysis, supplemented by data collection, can help to reduce unnecessary and arbitrary detention.<sup>145</sup>

### *C. Why Alternatives to Detention are Important*

In the spectrum between full detention and unrestrained liberty, ATDs occupy any method that is not at either extreme.<sup>146</sup> These methods include, from the most to the least restrictive: in-home detention and electronic monitoring; supervision or reporting; residency restrictions; release to community supervision; release on bail, bond, or surety; and documentation.<sup>147</sup> It is important to note, however, that just because a given method has been classified as an ATD does not mean it necessarily

147. *Id.* at 53.

complies with international law.<sup>148</sup> The intensity of a given ATD method varies, but in order to avoid violating international legal mandates it should comport with the level of risk established via risk-analysis on a case-by-case basis.<sup>149</sup> Because of this, asylum-seekers already eligible for parole without restrictions should not be placed in ATD programs that are more restrictive than parole as doing so would result in more restrictions on liberty than necessary.<sup>150</sup> ATDs should be utilized for those asylum-seekers who do not require more restrictive deprivations of liberty, such as detention, and not as a substitute for lesser restrictions like release on parole.<sup>151</sup>

Many ATD methods, if implemented properly, could allow the United States to harmonize the delicate balance between the systemic risks that lead to over-detention and the international human rights laws that only authorize detention as a last resort.<sup>152</sup> This is because many ATDs occupy a middle ground, addressing the risks that detention is intended to prevent while allowing the asylum-seeker to be free from unnecessary or arbitrary detention.<sup>153</sup> Some programs utilize residency restrictions in a variety of ways, including “open centers, semi-open centers, [or] directed residence” that often allow the asylum-seeker to be released into the community with varying levels of supervision.<sup>154</sup> The most successful ATD programs utilize a combination of ATD methods designed to meet the needs and risks of individual asylum-seekers.<sup>155</sup>

Yet even some ATD programs can violate international law; methods such as home detention and electronic tagging are “very intensive” methods in relation to the restrictions they place on liberty and can rise to the level of detention despite technical release.<sup>156</sup> It is possible that even allowing for release

on bail, bond, or surety—often considered less restrictive and typically involving no more restrictions on liberty than a financial or vouch-person guarantee—may violate international law where asylum-seekers remain unnecessarily detained simply because they have little access to funds or community sponsors, and not because they pose a threat.<sup>157</sup> As such, implementing these methods alone may not bring the United States into compliance with international law.<sup>158</sup>

One example of a successful NGO pilot ATD program is the community supervision experiment titled “Appearance Assistance Program” (“AAP”), developed and tested in the late 1990s by the Vera Institute of Justice at the request of then-extant INS.<sup>159</sup> The program provided for asylum-seekers classified in its “intensive” track<sup>160</sup> to be released from detention to the supervision of AAP staff.<sup>161</sup> The supervision included monthly monitoring and reporting requirements—both in person and via phone—and repeated flight-risk evaluations.<sup>162</sup> AAP also offered support to asylum-seekers by giving information about obligations, hearing dates, the legal process, and the available services within the community.<sup>163</sup> By utilizing strategic intake interviews and supervision that had the potential to alert AAP staff of participant non-compliance or the threat thereof, AAP staff were able to recommend decreased, constant, or increased supervision, or even redetention if necessary.<sup>164</sup> Not only did asylum-seeker participants have high appearance rates at court dates<sup>165</sup>—93%—thereby addressing the risks used to jus-

tify categorical detention,<sup>166</sup> but the program also reduced unnecessary detention by presuming release and only redetaining those who violated the conditions of release or who truly were a flight risk.<sup>167</sup>

### III. IMMIGRATION, DETENTION, AND PATH DEPENDENCY

Despite the expansive reach of ICE and DHS detention powers, the United States is on the edge of immigration reforms that have the potential to change the face of the immigration system and could bring the country within the standards mandated by international laws.<sup>168</sup> The Obama Administration began to discuss an overhaul of the immigration detention system in response to an unfavorable report by a DHS consultant.<sup>169</sup> Since then, a series of developments has energized the reform advocates seeking to alter the status quo of immigration and detention in the United States.<sup>170</sup> Attorney General Eric Holder made a 2011 announcement (“PD Memo”) that granted discretion to ICE officers to decline prosecution or detention in a number of situations, including those pertaining to asylum-seekers.<sup>171</sup> Additionally, in late 2011, DHS began a review of 300,000 immigration cases with the aim of implementing the PD Memo and allowing the department to focus its limited resources on “deporting foreigners who committed serious crimes or pose national security risks.”<sup>172</sup> Furthermore, ICE has recently developed and begun testing a risk assessment tool to be used in determining parole-eligibility for detainees, slated for

nationwide implementation in 2012.<sup>173</sup> The United States has also consolidated multiple former ATD programs into one – the Intensive Supervision Appearance Program II (“ISAP II”) – and executed a contract with a private company to administer it.<sup>174</sup> Finally, several senators introduced a bill during the 112<sup>th</sup> session to enact “comprehensive immigration reform” which includes provisions for the protection of asylum-seekers.<sup>175</sup>

The importance of this reform momentum can be illustrated by the theory of *path dependency*, first popularized by economist Paul David in the mid-eighties, wherein “individual decision[-]making early on in the path may lead to a ‘lock-in’ of a pattern that is collectively suboptimal.”<sup>176</sup> To illustrate the theory, David examined the series of decisions made by individual business owners and individual typists to buy and be trained on QWERTY keyboard models. The purchase of these keyboards led to the “lock-in”, or enduring prominence, of the suboptimal keyboard configuration long after the technology that required said layout had been phased out.<sup>177</sup> The lock-in of a given method creates “the very heavy disincentives that face those who would wish to depart significantly from that which has gone before,” and acts to reinforce the existing situation.<sup>178</sup> It is significantly more difficult to alter the course after the method becomes “locked-in” because of the “technical interrelatedness, economies of scale, and quasi-irreversibility of investment” that lead to the method becoming entrenched despite other, better, methods being available.<sup>179</sup>

177. David, *supra* note 23. David declared the configuration suboptimal because winning speed-typists typically utilized a Dvorak Simplified Keyboard (“DSK”) layout and because a U.S. Naval study revealed that the cost of retraining typists to use the DSK layout could be recouped within ten days due to the increased efficiency of the typists on that keyboard. *Id.* at 332. By the time the technological limitation that required the QWERTY configuration – jamming typebars – was obsolete, the configuration was already locked-in. *Id.* at 333–34.

178. Wilsford, *supra* note 178, at 253–54.

179. David, *supra* note 23, at 334. In the QWERTY example, David describes “technical interrelatedness” as the positive feedback loop between

The U.S. detention of asylum-seekers is similar to the QWERTY conundrum.<sup>180</sup> The prominence of the presumption in favor of detention can be, in part, explained by the positive feedback loop between the public and political responses to terrorism.<sup>181</sup> Decisions made in response to terrorism have contributed to the prominence of mandatory detention for asylum-seekers, at least until they can prove they are not a risk.<sup>182</sup> Now it is clear that categorical mandatory detention is suboptimal, as it violates international laws.<sup>183</sup> Despite being obsolete, the presumption in favor of detention might now be locked-in because it is easier to continue using it than to alter infrastructure and training to facilitate eliminating it.<sup>184</sup>

---

individuals choosing to learn QWERTY typing because business owners seek to hire QWERTY-trained typists and business owners purchasing QWERTY machines and thus seeking to hire QWERTY-trained typists. *Id.* at 334–35. “Economies of scale” are represented by the decrease in “user costs of a type-writing system based upon QWERTY . . . as it gained acceptance relative to other systems.” *Id.* at 335. David illustrates the “quasi-irreversibility of investments” as the point in development when QWERTY keyboards became “locked-in” because “it became privately profitable [for non-QWERTY manufacturers] in the short run to adapt machines to the habits of men...rather than the other way around.” *Id.*

C, 110 Stat. 3009-546 (1996) (creating mandatory detention for some classes of non-citizens). *See generally*, David, *supra* note 23.

183. *See Part I.C., supra; See generally, David, supra note 23.*

184. *See generally, David, supra* note 23. *Compare Exercising Prosecutorial Discretion, supra* note 6, *with Preston, supra* note 7.

Digressing from the path is not impossible.<sup>185</sup> Radical deviations from the status quo become more likely when institutional frameworks that keep to the current path, like ICE policies in favor of detention, meet with unpredictable external forces, like the current momentum for U.S. immigration and detention reform.<sup>186</sup> Like political reform momentum, external forces in the *path dependency* context are “fleeting coming together of a number of diverse elements into a new, single combination.”<sup>187</sup> Because of this, U.S. immigration and detention reform is at a critical juncture where immense change is possible.<sup>188</sup> It is essential that the United States capitalize on this opportunity and reform in a way that brings its practice into compliance with international law standards as this moment is fleeting and changes in the elements, such as the inauguration of a new political party into power, could close the window of opportunity.<sup>189</sup> In addition to haste, it is imperative to alter the status quo in a way that does actually bring the United States within international law mandates because anything else could potentially lock-in a new, equally suboptimal method.<sup>190</sup>

#### IV. IGNORING RECOMMENDATIONS OF ASYLUM EXPERTS LEADS TO INEFFICIENT REFORMS IN THE ASYLUM DETENTION SYSTEM

Rather than taking full advantage of the opportunity to bring its immigration and detention system into compliance with international human rights law, the United States has constructively ignored the recommendations of asylum experts and, thus, recent efforts at progress have failed to amount to any significant decrease in unnecessary or arbitrary detention.<sup>191</sup> In

Despite the presence of the sort of externalities that standard static analysis tells us would interfere with the achievement of the socially optimal degree of system compatibility, competition in the absence of perfect futures markets drove the industry prematurely into standardization *on the wrong system* – where decentralized decision making subsequently has sufficed to hold it. (emphasis in original).

191. *Compare* Exercising Prosecutorial Discretion, *supra* note 6, with Preston, *supra* note 7.

some instances NGOs have achieved high success rates in designing and piloting programs that implement their recommendations for risk analysis and ATDs.<sup>192</sup> However, as this Part will illustrate, the United States has repeatedly decided against implementing their recommendations and has instead moved toward a suboptimal path in which reformed programs continue to violate international obligations.<sup>193</sup>

#### *A. The United States Takes Steps Toward Suboptimal Risk-Analysis*

When ICE, DHS, and the Obama Administration pledged an overhaul of the U.S. immigration and detention system, they identified the need for a risk assessment mechanism that would facilitate non-citizens in being either paroled or enrolled into ATD programs.<sup>194</sup> At the beginning of 2010, ICE worked with various NGOs, led by the Lutheran Immigration and Refugee Service (“LIRS”), to develop this “risk assessment tool.”<sup>195</sup> The exact details of this tool have not been made public.<sup>196</sup> However, both LIRS and Human Rights First indicated that ICE’s tool is designed to use “objective criteria to guide decision-making regarding whether or not an alien should be detained or released; the alien’s custody classification level, if detained; and the alien’s level of community supervision (to include an ICE ATD program), if released.”<sup>197</sup> LIRS noted that the tool “includes mathematically weighted factors that should signal the likelihood of threat to the community based on past

---

192. See, e.g., UNLOCKING LIBERTY, *supra* note 20, at appendices B, C, D, 54–61; VERA, *supra* note 16.

193. See, e.g., UNLOCKING LIBERTY, *supra* note 20, at 29.

194. SCHIRO, *supra* note 18, at 17, 20. While ICE does have a system in place that “classifies detainees as low, moderate, or high custody[, t]he primary basis for classification is criminal history[,]” and its purpose is to aid in housing already detained aliens and not for risk analysis associated with parole. *Id.* at 17.

195. *Detention Reform Accomplishments*, *supra* note 170; UNLOCKING LIBERTY, *supra* note 20, at 21.

196. UNLOCKING LIBERTY, *supra* note 20, at 21.

197. UNLOCKING LIBERTY, *supra* note 20, at 20; JAILS AND JUMPSUITS, *supra* note 35, at 29. While LIRS did not indicate where they received the information, Human Rights First quoted email correspondence between their office and ICE officials, dated October 1, 2011. *Id.*

behavior as well as of absconding for each and every individual ICE apprehends.”<sup>198</sup>

The tool, slated for nationwide implementation in 2012, has already garnered criticism from those to whom ICE has granted advanced exposure.<sup>199</sup> In reviewing a pilot version, the UNHCR expressed concern that the “tool, based on a mathematical calculation, risks becoming a bureaucratic, tick-box exercise and may lead only to artificial individual assessments rather than real ones. It also appears heavily weighted in favour of detention.”<sup>200</sup> Based on these assessments, it seems that this aspect of ICE’s tool could become arbitrary and thus would not satisfy international obligations.<sup>201</sup> The continued presumption for detention also violates the guidance for implementing the policies advocated in the UDHR, 1951 Convention, 1967 Protocol, and ICCPR.<sup>202</sup>

Furthermore, although designed subsequent to ICE consultations with NGOs specializing in asylee and refugee protection,<sup>203</sup> the tool apparently falls short of asylum experts’ recommendations.<sup>204</sup> LIRS, after providing support to ICE in the development stages of the tool, found it contains a “total absence of individualized assessment of risk for people subject to mandatory detention. There is also no standard assessment of risk with judicial review for people eligible for parole, such as arriving asylum-seekers who are found to have a credible fear of return.”<sup>205</sup> These apparent shortcomings affect the ability of the United States to sufficiently satisfy international standards by, specifically, avoiding arbitrariness through individualized assessments and judicial review.<sup>206</sup>

202. See UDHR, *supra* note 66, at art. 14(1) (III); Refugee Convention, *supra* note 15; Protocol to Refugee Convention, *supra* note 15; ICCPR, *supra* note 66, at art. 9(1). See also Part I.C., *supra*.

203. *Detention Reform Accomplishments*, *supra* note 170; UNLOCKING LIBERTY, *supra* note 20, at 21.

204. UNLOCKING LIBERTY, *supra* note 20, at 21 (“While the list [of special vulnerability factors to be included in the tool] falls short of the recommendation from experts to ICE, the creation of a tool can be followed by improvement of it.”).

205. *Id.* at 41.

206. See *supra*, Part B.1.

By ignoring the recommendations of LIRS and other asylum experts involved in the development of the tool, ICE squandered a valuable opportunity to comply with international law.<sup>207</sup> Subsequent to viewing ICE's new tool, LIRS published their recommendations to ICE regarding a risk assessment tool.<sup>208</sup> It envisions a dynamic individualized assessment procedure that encourages release, or, if some form of detention is necessary, the least restrictive ATD or detention procedure necessary to mitigate the risks presented by the individual alien.<sup>209</sup> It also allows for review of a determination should there be a change in circumstances or risk factors for an asylum-seeker.<sup>210</sup> Had ICE adopted a risk-assessment tool in line with these recommendations, it would allow for a greater chance of eliminating arbitrary, unnecessary detention.<sup>211</sup> Instead, ICE has selected a suboptimal path that has the potential to "locking in" continuing violations of international human rights law for future iterations of the tool.<sup>212</sup>

#### *B. ICE Takes Steps Toward Suboptimal ATDs*

In 2004, Congress approved funding for ATD programs and ICE solicited bids for the contract to manage them.<sup>213</sup> Various NGOs—including the Vera Institute—bid for the contract, basing their qualifications on their expertise in refugee, asylee, and immigration services.<sup>214</sup> In a further example of the United States selecting to move down a suboptimal path, ICE "gave the contract to Behavioral Interventions Inc., a private company whose model was based on the use of electronic monitoring."<sup>215</sup> Behavioral Interventions Inc. ("BI") and its parent company still hold the U.S. ATD contract.<sup>216</sup>

215. *Id.*

216. *Id.*

Commonly used in the criminal judicial system, home curfew and electronic tagging are the most restrictive ATDs, and, as noted above, are considered by some to be an additional form of detention.<sup>217</sup> BI currently uses ICE's congressional ATD funding to combine those most restrictive methods with reporting requirements—"installation of biometric voice recognition software, unannounced home visits, employer verification, and in-person reporting to supervise participants"<sup>218</sup>—to administer a single program: the Intensive Supervision Appearance Program II ("ISAP II").<sup>219</sup> While for the first time in 2009 ICE included the presence of a "needs-based case management component" as a requirement for a company to obtain the ATD contract, this appears to be an as yet unfulfilled commitment.<sup>220</sup> In looking at the restrictive nature of these methods, scholars have noted, "sometimes what is called an alternative to detention may in fact be an alternative form of detention."<sup>221</sup>

This is especially true when considering that "rather than looking to the current detention populations and utilizing various supervision methods as a step down from unnecessary detention, [ISAP II] is seeking individuals already released into the community to increase restrictions of liberty on more people."<sup>222</sup> The use of ISAP II in these scenarios remains arbitrary and subject to the discretion of the ICE officer analyzing the parole eligibility of an asylum-seeker.<sup>223</sup> For example, while "[a]liens should be assigned conditions of supervision according to an assessment of the alien's flight risk and danger to the community[, in ISAP II] assignment to a[n ATD] program is determined in part by residency," as only those asylum-seekers detained in close proximity to a regional ISAP II office are eli-

222. UNLOCKING LIBERTY, *supra* note 20, at 32. This theory is additionally supported by statements of ICE officials to Congress in explaining their 2012 budget requests: "[T]he ICE Assistant Secretary noted that the cost of ATD per individual is higher than detention per detainee . . . because the individuals enrolled in ATD remain in the system significantly longer than those in detention." H.R. REP. NO. 112-91, at 53 (2011).

gible to participate.<sup>224</sup> “ICE has not requested-and Congress has yet to authorize-sufficient funding to expand ATD programs nationally-so that any immigration detainee who is eligible for an ATD program could be placed into it.”<sup>225</sup>

Furthermore, ICE’s plan for ISAP II “would *not* use ATDs as an alternative that would decrease the use of existing detention beds...[t]he total number of individuals in ICE custody or supervision, whether detained on Alternatives to Detention, would increase under this plan.”<sup>226</sup> Thus, the United States continues to unnecessarily detain parole-eligible asylum-seekers by placing them into ISAP II.<sup>227</sup> “ICE’s plan also explicitly precludes the use of ATDs for individuals who are technically subject to ‘mandatory detention.’”<sup>228</sup>

#### V. POLICY BENEFITS TO UNITED STATES SHOULD IT ADOPT THE RECOMMENDATIONS

In addition to the benefit of being in compliance with international human rights laws, there are numerous advantages for the United States should it adopt the proposed programs.<sup>229</sup> First, the country can maintain its status as a leader in the international community in good faith, and a stance of internal compliance will better position the country to encourage other nations to follow suit.<sup>230</sup> Next, much of U.S. foreign policy in the war on terror depends on how the country is perceived in the international community and among individual populations.<sup>231</sup> Because many people will still be deported, how they feel about the process and what they say to others upon return to their countries may have an impact on public image in areas where the United States desperately needs support.<sup>232</sup> A reputation of humanitarian treatment and fair dealings could go a long way.

Finally, there is an enormous potential for financial savings.<sup>233</sup> Currently, it costs \$95 per day to detain an asylum-seeker, but only \$22 per day to support that same person in an alternative program.<sup>234</sup> Some estimate that the disparity could be even more extreme, with ICE overhead costs bringing detention costs up to \$164 per detainee per day while some forms of ATDs cost as little as thirty cents per day.<sup>235</sup> While the numbers include more than just asylum-seekers, the savings associated with detaining only those who present a true risk, such as only detaining those who have “committed violent crimes, the agency could save nearly \$4.4 million a night, or \$1.6 billion annually—an 82% reduction in costs.”<sup>236</sup>

#### CONCLUSION

When coupled with an efficient and individualized risk analysis program, Alternatives to Detention adequately address the risks of releasing the majority of asylum-seekers into the community during the pendency of their asylum processing.<sup>237</sup> Instituting this combination would benefit the United States financially and in its international standing in addition to allowing the United States to comply with its international human rights obligations regarding the detention of asylum-seekers.<sup>238</sup> The United States should move quickly to adopt the recommendations of asylum experts, capitalizing on the current momentum for reform in the detention system and decisively ending its violations of international human rights laws.
